# About Nilotica Shea Butter

Premium grade Nilotica (Vitellaria Nilotica) is sourced from the Nile region of East Africa. It has a softer texture, is higher in oleic acid content and is superior skin absorption abilities compared to other shea butter

## Why Choose Nilotica Shea Butter

- Ultra hydrating & fast absorbing
- Exceptionally high in essential fatty acids & antioxidants
- Naturally soft & creamy at room temperature
- Ethically sourced from women led co-operatives

## Key Applications in Cosmetic Formulations

- Luxury skincare: Body butters, facial creams, anti aging serums
- Haircare: Deep conditioning masks, scalp treatments, leave-in creams
- Sun care & repair: After sun lotions, SPF formulations
- Lip care & balms: Highly emollient for soft, nourished lips

# NILOTICA SHEA ALLIANCE

## Elevate your cosmetic portfolio with Nilotica Shea Butter

## Key Scientific Composition & Formulation Benefits

- **Oleic Acid (50–65%)**
  Deep moisturization & fast absorption
- **Stearic Acid (25–32%)**
  Skin protection & smooth texture
- **Linoleic Acid (4–9%)**
  Skin regeneration & anti inflammatory
- **Vitamin E (Tocopherols)**
  Antioxidant, protects against oxidative stress
- **Phytosterols & Triterpenes**
  Boost collagen, soothe & repair skin

## How to Source it

- Available in bulk raw, filtered and refined formats
- Custom supply solutions are available for brands and formulators
- Direct trade with trusted East African producers ensures quality and traceability

## Phytochemical Composition & Benefits

- **Tocopherols (Vitamin E)**
  Powerful antioxidant, protects against oxidative stress
- **Triterpenes & Lupeol**
  Soothing, anti inflammatory and enhances collagen production
- **Phytosterols**
  Helps repair and strengthen the skin barrier

## Unique Cosmetic Benefits vs Other Shea Butter

- **Higher Oleic Acid**
  Faster absorption, softer feel
- **Lower Stearic Acid**
  Naturally soft, no need for excessive heating
- **Superior Emolliency**
  Ideal for premium skincare & sensitive formulations

## Technical Data for Formulators

- **Colour**: Pale yellow or light yellow
- **Texture**: Soft and creamy
- **Refractive** index: 1.460-1.675
- **Density**: 0.924g/cm
- **Specific** gravity: 0.91-0.93
- **Melting point**: 26-32°C (Soft at room temperature)
- **Saponification value**: 165-195 mg KOH/g
- **Free fatty acids**: <0.5%
- **Iodine value**: 65-85g/100g
- **Peroxide value**: <10 meqo2/kg
- **Shelf life**: ~2 years when stored properly

*Ideal for natural beauty formulations, sensitive skin products & luxury skincare brands*
